

Clinical experience series

Independent economic and
implementation summary

Reported cost savings following the introduction of the Maxxcare Heel Pro Evolution

About this publication

This publication presents a cost-saving poster developed within Counties Manukau District Health Board in New Zealand following the replacement of the organisation's previous heel protector product with the Maxxcare Heel Pro Evolution.

The poster summarises locally calculated cumulative savings, average monthly savings and projected annual savings during the reported implementation period from September 2018 to March 2019.

Maxxcare shares this publication with permission from the original rights holder to make real-world economic and implementation experience available to healthcare professionals and healthcare organisations. The wording, calculations, conclusions and opinions expressed are those of the original authors.

Disclaimer

The statements, product comparisons, economic calculations and conclusions presented in this publication originate from external healthcare professionals and reflect the circumstances within their own healthcare organisation.

This publication is shared by Maxxcare B.V. with permission from the original rights holder. The reported savings are specific to the local purchasing arrangements, comparison product, product utilisation, clinical practice and reporting period described in the original poster.

The figures have not been independently reproduced or verified by Maxxcare B.V. and should not be interpreted as a formal health-economic analysis, a guaranteed saving or a generally applicable economic claim made by Maxxcare B.V. Financial outcomes may vary substantially between healthcare organisations and care settings.

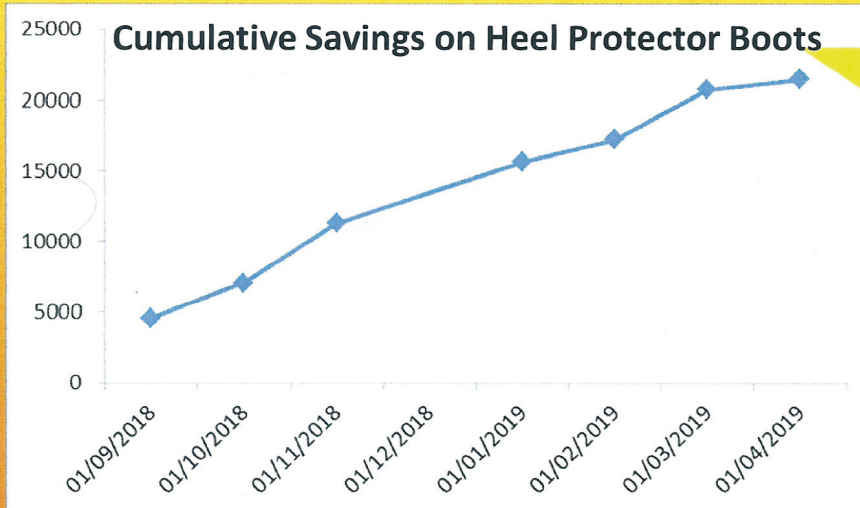

The description "clinically superior" appears in the original poster and reflects the wording of its original authors. It does not constitute an independently established comparative claim made by Maxxcare B.V.

This publication is not intended to guarantee specific clinical or economic outcomes.

Counties Manukau District Health Board. Cost-saving poster concerning the substitution of the organisation's usual heel protector product. Reporting period September 2018–March 2019, New Zealand, 2019.

We substituted our usual Heel Protector product for a clinically superior and less expensive product which has saved us

\$21,500*

* From September 2018 – March 2019

Each month we are saving on average

\$3000!

Also the product we are using is clinically proven to reduce Pressure Injuries which cost our organisation thousands of dollars a year!

Over a year, this will save us around...

\$36,800!
